

JANUARY 2015 – etfSA.co.za MONTHLY SOUTH AFRICAN ETF, ETN AND UNIT TRUST PASSIVE INDEX TRACKING PERFORMANCE SURVEY

Mike Brown, Managing Director, etfSA.co.za

The Performance Survey of “passive” index tracking Unit Trusts and ETFs for the period ended January 2015, has rand hedge products, such as the **DBX Tracker** “foreign” equity ETFs continuing to hold sway for periods of 2 to 5 years, but **Satrix INDI 25 ETF** still remains the best long-term investment for 5-10 years.

Property index trackers dominate the performance returns for periods of 1 year or less, with the ETF property tracker funds holding a clear edge over unit trust property trackers. The possibility of a low interest rate environment in South Africa for some time ahead, should continue to promote the merits of property shares as an asset class in their own right in future.

* Includes reinvestment of dividends.

The etfSA.co.za Performance Survey measures the total return (Net Asset Value (NAV to NAV)) changes including reinvestment of dividends) for index tracking unit trusts and Exchange Traded Funds (ETFs) available to the retail public in South Africa. The performance tables (attached) measure the 1 month to 10 years total return for a lump sum investment compared with the benchmark index returns (including reinvestment of dividends). All indices are shown in total return format.

Note, as the FTSE/JSE calculates the index without taking into account any brokerage or other transaction costs, index tracking products will typically slightly underperform the index because of their transaction and other running costs.

Please Note: future investment performance will not necessarily replicate historic performance data. All data used in the Survey is sourced from Profile Media, who obtain daily data from all index tracker product issuers.
