5 reasons to buy db x-trackers ETFs

- **Diversify offshore:** Protect yourself against Rand weakness by investing in overseas stock markets.
- **No red tape:** Non-institutional investors can diversify their investment portfolio with no exchange control limits.
- **Cost effective:** Low annual management fees means that db x-trackers ETFs offer a cost-effective way to achieve equity exposure to key offshore indices.
- **Solid performance:** db x-trackers ETFs aims to track their benchmark index (passive management) as closely as possible and do not strive to outperform it, so minimal tracking error is achieved.
- **Convenient:** Whether you want to invest in db x-trackers ETFs through a lump sum payment or a monthly debit order, you can invest in a way that best suits you.

Advantages of ETFs

- Gain instant market exposure in one transaction
- Low cost minimising tracking error
- Continuous stock exchange trading and liquidity
- Trade ETFs just like shares
- High transparency through daily published Index constituents
- Cost effective
- Offshore equity portfolio diversification without exchange control limits for non-Institutional investors

Exchange Traded Funds – ETFs

Exchange Traded Funds (ETFs) are passively managed investment funds that track the performance of an underlying index. Almost anything you can do with a share you can do with an ETF unit. Traditional funds (funds with units not listed on an exchange), typically only offer the opportunity to subscribe or redeem units at the Net Asset Value (NAV) on each day. The Deutsche Bank sponsored ETFs offer the same trading opportunities as shares on the JSE and are quoted continuously during exchange trading hours.

How to Invest

ETFs can be bought or sold via any stockbroker, financial advisor or direct from db x-trackers. The db x-trackers Investment Plan allows you to invest as little as R1,000 in a once off lump sum investment or via a monthly debit order of R300 or more.

Benchmark Index

The FTSE 100 Index is a market capitalisation weighted index representing the performance of the 100 largest UK – domiciled blue chip companies, which pass screening for size and liquidity. For changes to index constituents please refer to the published SENS. The index represents approximately 81% of the UK's market capitalisation. Index constituents are all traded on the London Stock Exchange's SETS trading system. The Index had a base value of 1,000 on January 3, 1984. Index performance data can be sourced from Bloomberg, Reuters, other data providers and at www.dbxtrackers.co.za.

Investment Objective

To replicate the price and yield performance of the FTSE 100 Index as closely as possible by physically holding a portfolio of securities substantially equivalent to the basket of securities comprising Index and in the same weightings of the Index.

Investment Risks

Investment in db X-trackers ETFs involves a number of risks including, among others, general market risks, exchange rate risks, interest rate risks, inflationary risks, liquidity risks and legal and regulatory risks. db X-trackers are not capital protected. Investors may not get back the money invested. The value of an investment may go up or down and past performance is not a guide to the future. Please refer to the Offering Circular for further information on investment risks.

³The fund has a Total Expense Ratio (TER) of 0.86%. For the period 01 July to 30 June 2017 0.86% of the average Net Asset Value of the portfolio were incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Effective 1 July 2013 management fee was reduced to 0.855% which will fully reflect in the TER once 12 months have passed but the actual savings on fees are immediate.

⁴db x-trackers dividend yield is calculated net of management fee and foreign withholding tax and using the current NAV.

General Disclaimer in terms of Collective Investment Schemes in Securities: db x-trackers are Collective Investment Schemes in Securities (CIS) which are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from db x-trackers. Commission and incentives may be paid and if so, would be included in the overall costs.

db x-trackers securities are Exchange Traded Funds (ETFs) that trade on stock exchanges. Trading in ETFs will incur the normal costs associated with listed securities, including brokerage, settlement costs, Securities Transfer Tax (STT), other statutory costs and administrative costs. The price at which ETFs trade on an Exchange may differ from the Net Asset Value price published at the close of the trading day, because of intraday price movements in the value of the constituent basket of securities.

In the case of db x-trackers securities fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.
