- Cost effective alternative to traditional funds
- Protection against Rand depreciation
- Offshore portfolio diversification without exchange control limits for non-Institutional investors

Exchange Traded Funds — ETFs

Exchange Traded Funds (ETFs) are passively managed investment funds that track the performance of an underlying index. Almost anything you can do with a single share or stock you can do with an ETF unit. Traditional funds (funds with units not listed on an exchange), typically only offer the opportunity to subscribe or redeem units at the Net Asset Value (NAV) on each day. The Deutsche Bank sponsored ETFs offer the same trading opportunities as single stocks on the JSE Limited and are quoted continuously during exchange trading hours. ETFs can be bought or sold via any stockbroker, financial advisor or direct from db x-trackers.

Underlying

The MSCI Japan Index reflects the performance of the Japanese equity markets. The Index contains about 400 constituent securities representing companies with a total market capitalisation of approximately US\$3 trillion. The MSCI Japan Index is recognised as a barometer of the Japanese economy and as the holder of db x-trackers MSCI Japan Index ETF, an investor will essentially track the Japanese equity markets.

These index sponsors shall not be liable to any person for any error in their indices and shall not be under any obligation to advise any person of any error therein. **General Disclaimer in terms of Collective Investment Schemes in Securities** db x-trackers are Collective Investment Schemes in Securities (CIS) which are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from db x-trackers. Commission and incentives may be paid and if so, would be included in the overall costs. db x-trackers securities are Exchange Traded Funds (ETFs) that trade on stock exchanges. Trading in ETFs will incur the normal costs associated with listed securities, including brokerage, settlement costs, Uncertified Securities Tax (UST), other statutory costs and administrative costs. The price at which ETFs trade on an Exchange may differ from the Net Asset Value price published at the close of the trading day, because of intraday price movements in the value of the constituent basket of securities. In the case of db x-trackers securities fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.
