SYGNIA ITRIX EURO STOXX 50 ETF FUND COMMENTARY

REGIONAL - EQUITY - GENERAL

3RD QUARTER 2018

MARKET PERFORMANCE

The third quarter of 2018 marked the 11th anniversary of the Global Financial Crisis and, as liquidity dried up over the US summer holidays, markets once again experienced heightened volatility. Emerging market contagion was the main driver as concerns spread from Argentina's fiscal problems and IMF bailout and Turkey's twin deficits to Brazil's contentious elections, Russia's US sanctions and South Africa's economic recession. Global traders came up with another acronym: BRATS. South Africa is the only country within BRATS that has not seen its credit rating downgraded to junk, albeit our markets are pricing in that downgrade. Beyond the idiosyncratic risks of the BRATS, the strong US dollar and rising US interest rates continue to lead to outflows from emerging markets, weakening their currencies and forcing them to hike interest rates once again to anchor inflation, a vicious cycle that puts further strain on their economies.

According to Bank of America Merrill Lynch, the number of global rate hikes is now at levels last seen before the Global Financial Crisis. Turkey, in a sign of capitulation, raised interest rates from 17.8% to 24%, while Russia increased rates for the first time in four years. The only positive is that this has been perceived as confirmation that the central banks of both countries remain relatively independent. At the same time, Argentina and Kenya implemented austerity measures to appease the IMF. Together with weaker than expected US consumer price inflation, these policy adjustments brought some calm to the emerging markets and their currencies by quarter end. Despite violent swings, the rand was only 2.9% weaker against the dollar over the quarter.

The US economy continued to strengthen, with equity markets hitting new highs, consumer confidence at its strongest levels in 18 years and jobless claims at 49-year lows. This has allowed the US Federal Reserve to increase interest rates for the third time this year and upgrade their growth expectations for 2019. Merrill Lynch's survey of asset managers' expectations reported the most favourable outlook for US earnings on record, reflected in the valuation of the S&P500 Index, which has outperformed the MSCI Emerging Market Index by 20% on a year-to-date basis. US focus will move to the mid-term elections of 6 November, where polls suggest that the Democratic Party is likely to take the House of Representatives, while the Republicans will keep the Senate. This is not ideal, but is likely to paralyse President Donald Trump on the domestic policy front. Irrespective of the results, however, he will retain free reign on foreign policy issues.

The picture looks less rosy for the rest of the world, hit by a strengthening US dollar, oil prices at four-year highs and global trade wars. Oil remains a headwind to growth and rose to US\$85/barrel as Trump announced sanctions on Iran's energy industry and Venezuela's supply decreased due to their economic crisis. The OECD has announced that global economic growth has peaked and lowered its growth forecasts for 2018, predominantly due to trade wars.

There seems to be no end to the US - China trade war, with both countries implementing second rounds of tariffs in September and China boycotting the annual UN Summit held in New York. The new tariffs bring the total value of Chinese goods levied with tariffs up to US\$250bn, and Trump threatened to expand tariffs to include an additional US\$267bn of Chinese imports, taking the total to over US\$500bn, roughly the size of all Chinese imports. The yuan weakened to a 12-month low and the Shanghai Composite Index fell to a low 25% from its January highs. Chinese growth is slowing and the Chinese government is attempting to support growth with both fiscal and monetary support, but these have yet to make an impact.

In Europe, the ECB kept interest rates unchanged while lowering its growth forecasts. The ECB confirmed that it will end its €2.6 trillion stimulus programme by the end of 2018, with a first hike likely only in September 2019. The UK's exit from the EU remains on the cards, but there is no deal in sight, as neither party is willing to compromise on the key issue of free movement of people. Further East, Russia held its biggest war games in four decades after Russian Prime Minister Dmitry Medvedev called US sanctions a declaration of economic war.

In Japan, Prime Minister Shenzō Abe was re-elected to his post on the back of the strongest economic growth in two years, despite inflation remaining close to zero and the Bank of Japan retaining stimulus measures. In Central and Latin America, Venezuela sold more oil assets to China in exchange for its badly needed financial support, a move that led Trump to threaten military action against the country. Sentiment remains unsettled by politics, with 41% of economic output from the G20 now governed by populists, up from about 4% in 2007. Brazil heads for key elections on 7 October. Italian Prime Minister Giuseppe Conte says his government can't adhere to EU budget rules, which sent Italian bond yields skyrocketing.

In South Africa, President Cyril Ramaphosa called for the constitution to be changed to allow land expropriation without compensation, causing massive investor anxiety. Economic data remained weak and inflation subdued as SA entered recession. In response, Ramaphosa presented a viable economic plan based on refocussing R50bn of expenditure towards stimulating economic growth. The plan includes the introduction of more competition in the telecommunications sector to bring down data costs, relaxation of visa requirements for foreigners to stimulate tourism, easing of immigration restrictions to bring in badly needed skills, finalisation of the Mining Charter, a R400bn infrastructure fund designed to create jobs, more private/public partnerships and some clarity on the land appropriation issue. However, there are no short-term solutions to the problems.

The quarter ended with the FTSE/JSE SWIX Index down 3.3%, the JSE All Bond Index up 0.8% and the rand 2.9% weaker relative to the US dollar.

FUND PERFORMANCE

The Sygnia Itrix Euro Stoxx 50 ETF delivered 2.3% for the quarter in rand terms, in line with its benchmark, the Euro Stoxx 50. The Fund benefitted from exposure to Total, Sanofi and SAP, while its exposure to Bayer AG, Anheuser-Busch InBev and Intesa Sanpaolo detracted from performance.

There were a few changes to the tracked index's constituents over the period, including the addition of Linde AG, Amadeus IT Group and Kering and the removal of Deutsche Bank, E.ON SE and Saint-Gobain.

The Fund remains true to its investment objective of delivering returns that mirror those of the Euro Stoxx 50.

DISCLAIMER

Sygnia Itrix (RF) (Pty) Ltd is a registered and approved Manager under the Collective Investment Schemes Control Act, 2002. Sygnia Itrix does not provide any guarantee with respect to the capital or return of the portfolio. Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily an indicator of future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending. ETFs trade on stock exchanges and may therefore incur additional costs associated with listed securities. Unlike a unit trust, which can be bought or sold only at the end of the trading day, an ETF can be traded intraday, during exchange trading hours. ETFs may invest in foreign securities, which may be exposed to macroeconomic, settlement, political, tax, illiquidity and foreign exchange risks. Additional information on the Index including its performance and tracking error can be viewed on the relevant Fund Fact Sheets on www.sygnia.co.za. A schedule of fees and charges may be requested via admin@sfs.sygnia.co.za or 0860 794 642 (0860 SYGNIA). The complete terms and conditions of your ETF investment are contained in the fund's offering circular, pre-listing statement, programme memorandum and/or supplemental. These documents may be obtained from www.sygnia.co.za or on request from Sygnia. Nothing in this document shall be considered to state or imply that the Fund is suitable for a particular type of investor.

IMPORTANT INFORMATION TO CONSIDER BEFORE INVESTING

INVESTMENT APPROACH

The Sygnia Itrix Euro Stoxx 50 ETF is a high risk, passively managed index tracking fund, registered as a Collective Investments Scheme, and is listed on the Johannesburg Stock Exchange as an Exchange Traded Fund. The objective is to replicate the price and yield performance of the Euro Stoxx 50® Index as closely as possible by physically holding a portfolio of securities equivalent to the basket of securities comprising the Index and in the same weightings of the Index. Index performance data can be sourced from Bloomberg, Reuters, other data providers and at www.sygnia.co.za.

BALANCING RISK AND REWARD

The Euro Stoxx 50® is a Blue-chip index in Europe. The index has become one of the leading stock exchange barometers for Europe and the euro-zone and includes 50 market sector leading euro-zone companies. Please refer to the Offering Circular for further information on investment risks. The recommended investment term for investors in the Sygnia Itrix Euro Stoxx 50 ETF is a minimum of five years.

Collective Investment Schemes (CIS) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily an indicator of future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Equity markets are volatile and the price of equities fluctuate based on a number of factors such as changes in the economic climate, general movements in interest rates and the political and social environment which will also affect the value of the securities held in the unit trust, thereby affecting the overall value of the unit trust. There are regulations in place which limit the amount that a unit trust may invest in securities, thereby spreading the risk across securities, asset classes and companies. The fund may also be exposed to liquidity risk. This relates to the ability of the unit trust to trade out of a security held in the portfolio at or near to its fair value.

Annualised performance figures represent the geometric average return earned by the fund over the given time period. Unannualised performance represents the total return earned by the fund over the given time period, expressed as a percentage.

Performance is calculated based on the NAV to NAV calculation of the portfolio. Individual investor performance may differ as a result of initial fees, the actual investment date and dividend withholding tax.

HOW ARE NAV PRICES CALCULATED?

Net Asset Value (NAV) prices are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio divided by the number of units in issue. The price at which ETFs trade on an Exchange may differ from the NAV price published at the close of the trading day, because of intraday price movements in the value of the constituent basket of securities.

FEES

A schedule of fees and charges is available on request from Sygnia Itrix. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges and trustee fees. Sygnia Itrix ETFs are Exchange Traded Funds that trade on stock exchanges and may therefore incur additional costs associated with listed securities. Sygnia Itrix does not provide advice and therefore does not charge advice fees.

WHAT IS THE TOTAL EXPENSE RATION (TER) AND TRANSACTION COSTS (TC)?

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past year. Transaction costs are a necessary cost in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and Transaction Costs should not be deducted again from the published returns. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return.

FOREIGN SECURITIES

The fund invests in foreign securities, which may be exposed to macroeconomic, settlement, political, tax, reporting or illiquidity risk factors that may be different to similar investments in South African markets. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down.

CUMULATIVE INVESTMENT PERFORMANCE

Cumulative investment performance is for illustrative purposes only. The investment performance is calculated by taking all ongoing fees into account for the amount shown, with income reinvested on the reinvestment date.

DISCLAIMER

Sygnia Itrix (RF) (Pty) Ltd is a registered and approved Manager under the Collective Investment Schemes Control Act, 2002 (Act No 45 of 2002). Mellon Capital Management Company is the appointed investment manager, registered with the Securities and Exchange Commission ("SEC"). Sygnia Itrix does not provide any guarantee with respect to the capital or return of the portfolio. Nothing in this minimum disclosure document will be considered to state or imply that the collective investment scheme or portfolio is suitable for a particular type of investor.

This document is for information purposes only and does not constitute or form any part of any offer to issue or sell, or any solicitation of any offer to subscribe for or purchase any particular investment. Whilst reasonable care was taken in ensuring that the information contained in this document is accurate, Sygnia Limited, or any of its affiliates do not accept any liability in respect of any damages and/or loss (whether direct or consequential) or expense of any nature which may be suffered as a result of reliance, directly or indirectly, on the information in this document. Additional information such as fund prices, brochures, application forms and a schedule of fees and charges be requested via admin@sfs.sygnia.co.za or 0860 794 642 (0860 SYGNIA).

You should be aware that certain transactions give rise to substantial risk. Product values may be affected by market values, interest rates, exchange rates, volatility, dividend yields and issuer credit ratings. The complete terms and conditions of your ETF investment are contained in the fund's offering circular, pre-listing statement, programme memorandum and/or supplemental. These documents may be obtained from www.sygnia.co.za or on request from Sygnia.

Sygnia Limited and any of its affiliates may make markets or hold units in the fund or hold positions in the investments in which the fund invests. As set out in the offering circular, the sale of securities is subject to restrictions in some jurisdictions. In particular, any direct or indirect distribution of this document into the United States, Canada or Japan, or to U.S. persons or U.S. residents, is prohibited.

INDEX DISCLAIMER

The Euro Stoxx 50® Index is the intellectual property (including registered trademarks) of STOXX Limited, Zurich, Switzerland ("STOXX"), Deutsche Börse Group or their licensors, which is used under license. The Sygnia Itrix Euro Stoxx 50 ETF is neither sponsored nor promoted, distributed or in any other manner supported by STOXX, Deutsche Börse Group or their licensors, research partners or data providers and STOXX, Deutsche Börse Group and their licensors, research partners or data providers do not give any warranty, and exclude any liability (whether in negligence or otherwise) with respect thereto generally or specifically in relation to any errors, omissions or interruptions in the Euro Stoxx 50® Index or its data.

EXCHANGE TRADED FUNDS VS UNIT TRUSTS

Whilst both unit trusts and ETFs are regulated and registered under the Collective Investment Scheme Control Act, ETFs trade on stock exchanges just like any other listed, tradable security. Unlike a unit trust, which can be bought or sold only at the end of the trading day, an ETF can be traded intraday, during exchange trading hours.
