Actively managed Unit Trusts and AMETFs aim to provide access to a single portfolio of underlying assets or securities which are discretionarily managed in terms of a predetermined strategy. The price at which ETFs and AMETFs trade on an exchange may differ from the Net Asset Value ("NAV") published at the close of the trading day, because of intra-day price movements in the of the constituent basket of securities. The portfolio is valued on business day at 17h00. The current price means the net asset value, which is the total market of all assets in the portfolio including any income accruals and less any quantifiable and nonquantifiable deductions from the portfolio divided by the number of participatory interests in issue.
