The objective of the Sygnia Itrix S&P Global 1200 ESG ETF is to provide an investment vehicle to investors who want to achieve long term capital appreciation in tracking the performance of the S&P Global 1200 ESG (S&P1200ESG) ("benchmark index"). It also aims to replicate the price and yield performance of the S&P Global 1200 ESG Index as closely as possible by holding a portfolio of securities equivalent to the basket of securities that comprise the Index, and in similar weightings to the Index. Index performance data can be sourced from Bloomberg, Reuters, other data providers and at www.sygnia.co.za.

Risk profile

The Fund has a 100% strategic allocation to global equities. The risk in the Fund is managed by spreading investments across countries, sectors and individual shares. However, the structure of the Fund is dictated by the composition of the S&P Global 1200 ESG Index. The S&P Global 1200 ESG index is a subset of the S&P Global 1200 index, designed to measure the performance of securities meeting sustainability criteria, while maintaining overall industry group weights as the S&P Global 1200 index.
